

Award winning HR software for farms

Farmers need better technology when it comes to managing their people.

problems	+	outdated solutions	=	costs
New rules & regulations		Pen + paper		More time spent in the office
New hiring forms		Binders and file cabinets		More money spent on HR staff
New health & safety hazards		“Phone-tree” communication		Paid (unproductive) time
COVID-19				Sick employees
				Penalties and fines

Harvust is taking these burdens off their hands.

Hiring forms optimized for mobile

Verified E-signatures

Mobile safety trainings

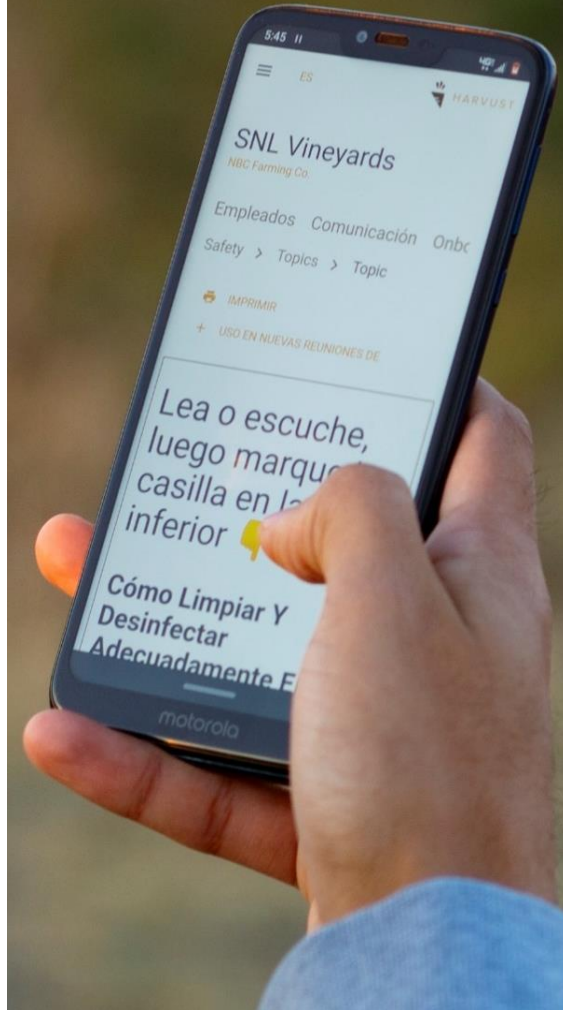

Organized records

SMS integration

Easy translations

With software that is 100% built for agriculture.

Voice translations

Password-less authentication

Integrations with other Ag software
